Technical Skills

- React
- NodeJS
- Express.js
- Mongo
- Mongoose
- MySQL
- Sequelize
- REST APIs
- jQuery
- Javascript
- HTML
- CSS
- Heroku
- Git

Projects

Eat the Burger | https://github.com/TajaMaughan/burger

> This project utilizes a custom ORM to access a MySQL database that holds a list of burgers, and keeps track of whether is has been "devoured" or is still uneaten. It is hosted on Heroku at https://mysterious-basin-54212.herokuapp.com/.

Google Book Search | https://github.com/TajaMaughan/GoogleBooks

> A project that utilizes the Google Books API to render a list of books from the user's chosen search term. Books are able to be saved to a Mongo database, then the list of saved books is able to be viewed. The front end is done in React, with a back end utilizing Node, Express, and Mongoose. The final project can be viewed at https://stark-mountain-32566.herokuapp.com/

Experience

Smith's Food & Drug   Sunset - Bountiful - Logan, Utah   April 2017 - Current,
Pharmacy Technician   July 2013 - January 2016
